

**Task:** Create simple editor for managing banners

### Requirements:

- #1 Default banner's position is center
- #2 Default banner's size is 300x150
- #3 Default banner's color is yellow
- #4 As a User I can see banner's properties (position, size, color) after clicking on corresponding banner
- #5 As a User I can change size of the selected banner by resizing it using mouse
- #6 As a User I can change size of the selected banner by changing w (width) or h (height) in banner's properties
- #7 As a User I can add up to 10 banners (after that "Add Banner" button should become inactive)
- #8 As a User I can delete any selected banner
- #9 As a User I can change position of the selected banner by dragging it
- #10 As a User I can change position of the selected banner by changing x (left) and y (top) values in banner's properties section
- #11 As a User I can change color of the selected banner from banner's properties

Banner Editor v1.0
